

REMLOCK™ NUT

FASTER SAFER NUT REMOVAL WITH NO HOT WORKS

No more struggling to remove nuts that, over time, are near impossible to get off, and then resorting to cutting them off with an oxy torch.

Davies unique RemLock nut combines thread locking and thread protection in a simple retro-fittable component. This reduces wear liner nut replacement time by up to 80% and eliminates hot works.

Advantages

- Installs like a normal nut in a single process
- Reduces nut removal time by up to 80%
- Safer removal (no hot works required)
- Separately removable nylon locking feature allows thread locking
- Direct replacement for existing lock nuts
